R. Laviotti
Secrétaire Général

As you know, the General Assembly of the World Health Organization has refused, during its 1976 May session, to accept the report of the W.H.O. Experts Committee, sent to investigate the health and sanitary conditions, in the Administered Territories, held by Israel.

This refusal was based on the fact that the experts had visited the Territories, on an individual basis. In fact, it was refused, because it was favorable for Israel.

I would like to ask again for your cooperation, in the defense of W.H.O. You will hereby find a copy of the letter I sent you last year, as to which nothing has to be added or changed.

André Lwoff
